

**FLEXTECH SRL** deals with **design, development, manufacture, converting and marketing of technical plastic films**, in particular in composite, wind energy, automotive, marine, VCI and electronic (antistatic, conductive, dissipative) packaging sectors and building industry. The company works in an international context and it addresses to both distributors and final end users by finding the most suitable technical solutions to meet customers' requirements.

In addition, Flextech srl performs **tolling of plastic products for third parties for industrial use**.

Research, innovation, technical competence and flexibility are Flextech's distinctive features, especially appreciated by the market. They allow continuous development and growth of the company.

In order to guarantee interested parts' satisfaction and its competitive strength, Flextech srl actualizes and keeps an Integrated System in compliance with UNI EN ISO 9001:2015 and UNI ISO 45001:2018 up to date.

In particular, the company resolves the following objectives and general addresses for Quality and Health and Safety:

- **BEING A LEADING COMPANY** in research and diversification of the products based on specific customers' demands, by seeking the most innovative solution from the technical point of view and the most satisfactory from the commercial point of view.
- **INCREASING INTERNAL PROCESSES EFFICIENCY** aiming at continuous improvement.
- **REACHING NEW MARKETS AND CUSTOMERS** with the developed product range
- **PROMOTING DEVELOPMENT AND OCCUPATIONAL GROWTH** of the personnel by boosting training, involvement, motivation and individual awareness.
- **DEVELOPING AND STRENGTHENING RELATIONSHIP WITH QUALIFIED SUPPLIERS** by sensitising and involving them to create a synergetic value chain.
- **ADOPTING THE BEST TECHNIQUES AVAILABLE AND ECONOMICALLY FEASIBLE** in order that the environment, equipment and work conditions remain adequate, safe and show suitable and proper characteristics for a correct execution of tasks.

In this field, Direction commits to guarantee planning and fulfillment of necessary activities to:

- Increase continuously improved efficiency and performance of internal Integrated System;
- Keep safe and healthy work conditions aiming at preventing possible accidents and occupational diseases, removing dangers and reducing risks for health and safety;
- Meet legal and any other binding requirements and meticulously and punctually observe any regulation applicable to self organization on the subject of health and safety in working areas and product safety;
- Guarantee that every employee, where established every Representative, is consulted and involved to promote an organization culture which can contribute to the System efficiency.
